

## BLUECHIP HIGH GROWTH LOW VALUATION STRATEGY

This is a Multi cap strategy which has quality Large, Mid & Small Cap Stocks from Nifty Total Market 750 index with high Sales & Profit growth and low valuation.

### METHODOLOGY

Multi-factor investing is an investment strategy where you build and manage a portfolio based on multiple factors. Instead of relying on just one style—like “value investing” or “growth investing”—you blend several factors to improve diversification and potentially enhance risk-adjusted returns.

#### Key Factors Commonly Used

- I. Stock Universe: Nifty Total Market (750 Stocks)
- II. High Sales Growth (20% minimum) and High Profit Growth (40%)
- III. Valuation – Portfolio PEG always maintain less than 1
- IV. Risk Mitigation – Low SD and Low Beta stocks
- V. Future outlook sectors which are growing

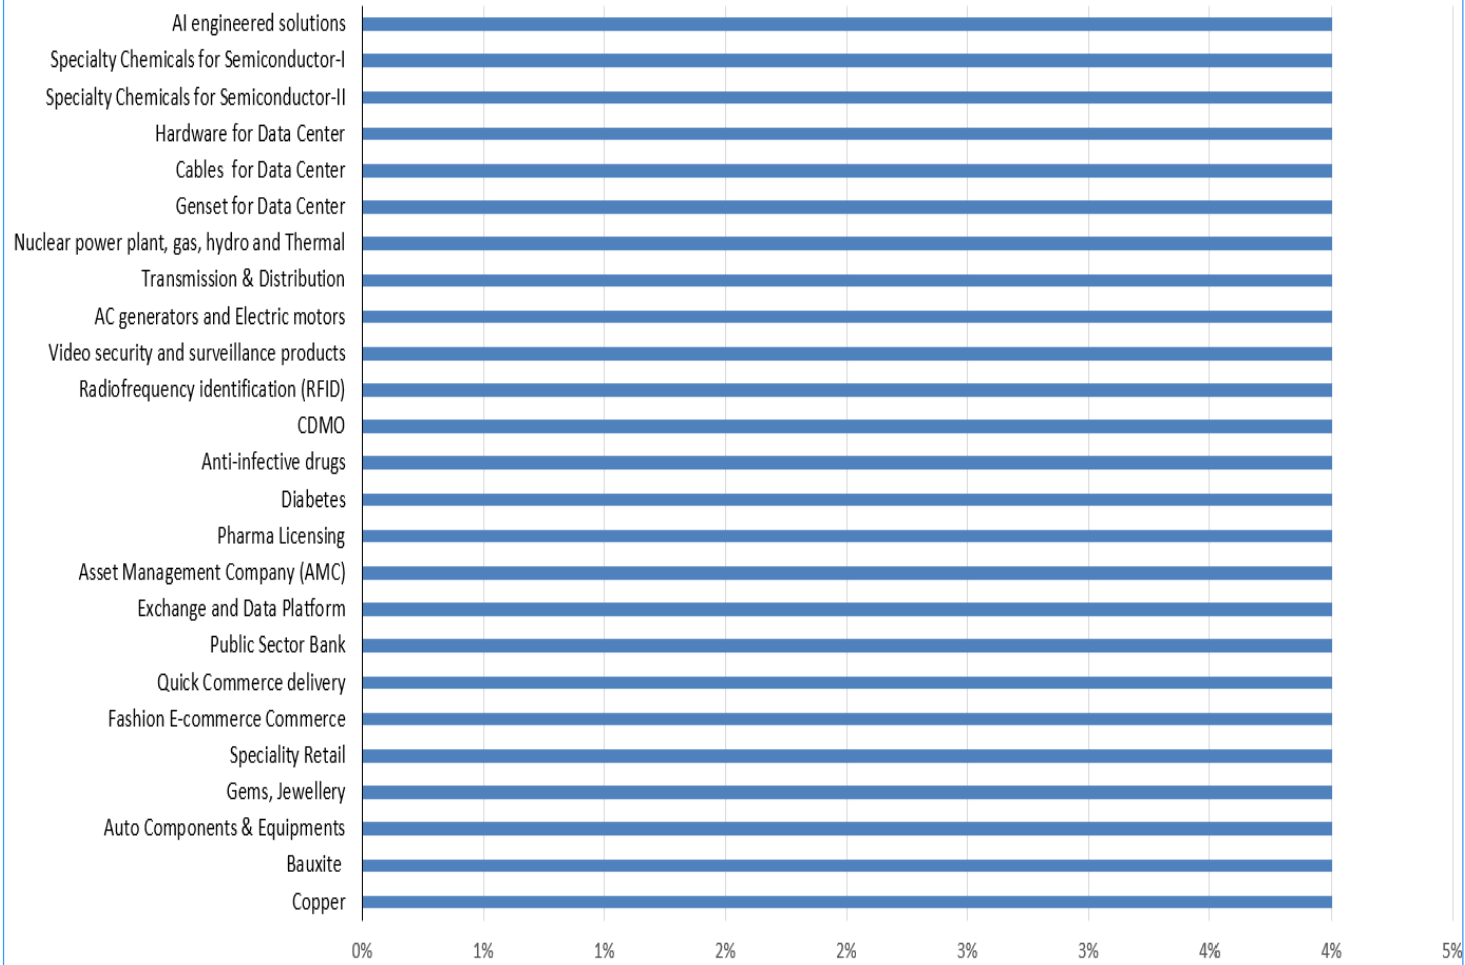

Portfolio Construction: Stocks are screened and ranked according to those factor scores and weighted equally

Diversification: By blending multiple factors, the strategy reduces the risk that any single factor underperforms for too long.

Market Cap Category – <b>Nifty Total Market 750 stocks</b>	Average Sales Growth YoY – <b>38.50</b>
No. of Sectors & Subgroups – <b>10 &amp; 19</b>	Average Profit Growth YoY - <b>61.60</b>
